To

1. The Chief Secretaries of all States and UTs
2. The Directors General of Police all States and UTs
3. The DGs/IGs Prisons of all States and UTs

Madam/Sir,

Please refer to this Ministry's Advisory No. 17013/23/2020-PR dated 3rd September 2020 whereby the States and UTs were advised to review the existing practices and procedures governing grant of parole, furlough and premature release to inmates, keeping in view the guidance provided in the Model Prison Manual, 2016 and guidelines issued by the Ministry of Home Affairs, National Human Rights Commission and the Supreme Court, from time to time. It was inter-alia advised that in order to ensure that inmates released on parole, furlough and premature release etc. do not violate law, systems must be put in place for monitoring and follow-up of each such case.

2. Considering the importance of taking timely action in the event of any inmate absconding/escaping from custody/prison, it is considered necessary to have recent photographs of prisoners updated in the system and also generate immediate alerts which would enable tracking of such inmates by the law enforcement agencies.

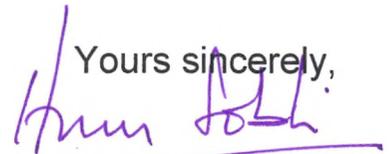

3. Systems have been developed on 'ePrisons' and Inter-operable Criminal Justice System (ICJS) to address the above issues. These IT Modules can be accessed by authorized ePrisons and ICJS users across the country. A brief User Manual is enclosed for reference. For providing easy access to users, the National Crime Records Bureau (NCRB) provides the facility of Virtual Private Network (VPN) to all registered users on ePrisons, CCTNS, eProsecution, eForensics and ICJS. This allows secure web-based access to authorized users irrespective of any internet service provider.

4. You are requested to issue instructions to all concerned on the following points:

- a) Prison Departments are required to update the details of any escape from the prison/custody on 'ePrisons' on a real time basis. Quick availability of this information will facilitate police and other authorities concerned in nabbing the escapee/absconder.
- b) States/UTs should leverage ePrisons application for updating the profile of inmates on a regular basis. The photographs of inmates may also be updated on ePrisons regularly to ensure that their latest photograph is available at the time of their release on bail/parole/release.
- c) Admission of inmates to Prisons should be made by through the ICJS module available in ePrisons application. This will ensure that FIR/Case data integrity is maintained all through and relevant data of inmates like Court Orders, Custody Certificate etc. can be exchanged with the Courts and Police in a seamless manner under ICJS.

- d) Appropriate systems need to be put in place for monitoring and follow up of each case of an inmate released on bail, parole, furlough and premature release etc. so that they do not violate law and indulge in criminal activities.
 - e) Any person who either attempts to escape from prison or absconds from custody should not be considered for grant of bail, parole or furlough.
 - f) State Police and Prison authorities should launch special joint drives to apprehend any escapee/absconding inmate in a Mission Mode by forming special teams. Advances in technology may be leveraged to generate alerts of such escapes on a real time basis through ePrisons, ICJS and Crime and Criminal Tracking Network & Systems (CCTNS) platforms.
 - g) All Prison functionaries should register for VPN and make use of the modules provided under e-prisons.
5. For facilitating easy usage of the above facilities, services of NIC may be obtained, who can provide training and hand holding sessions.

Yours sincerely,

(Arun Sobti)

Deputy Secretary (PR & ATC)
