INSURGENCY IN NORTH EAST

The terrain, the state of socio-economic development and historical factors such as language/ ethnicity, tribal rivalry, migration, control over local resources and long and porous international borders have resulted in a fragile security situation in the North Eastern States. This has resulted in violence, extortion and diverse demands by various Indian Insurgent Groups (IIGs) which maintain safe havens/camps in neighbouring countries. The insurgent outfits indulge in violent and terror activities and intimidate people with arms in order to achieve their objectives /demands. They maintain cross-border links, procure arms, recruit and train their cadres and indulge in unlawful activities. The security situation in North Eastern Region (NER) has improved significantly since 2014.
